

Improving the environment and reducing power consumption are important to us. We are doing our part through internal initiatives and embracing technologies that promote a cleaner planet.

Distributor of *eco*Choice.™

SED Goes Green Initiatives:

OFFICE

Implementing energy saving & ecological initiatives at SED locations around the world.

SHIPPING

Using environmentally friendly paper cushioning in SED packed boxes.

PRINTING

Marketing materials printed on FSC certified Recycled Paper through Smartwood.

PRODUCT

Highlighting products and manufacturers that feature green technologies.

Go to www.sedonline.com/green to see more details about SED's and our vendor partners' Green Initiatives.

TIPS FOR GREEN LIVING:

Use your SED Goes Green bag when grocery shopping • **Replace your light bulbs with energy efficient compact fluorescent light bulbs (CFLs)**

- **They use 2/3 less energy than traditional incandescent light bulbs and last 10 times as long** • Clean your driveway or sidewalk with a broom instead of hosing it down with water, you'll save at least 80 gallons of water every time • **USE A RAIN BARREL. WATER THE GARDEN OR WASH YOUR CAR WITH RAINWATER – HELP THE ENVIRONMENT AND SAVE MONEY ON YOUR WATER BILL AT THE SAME TIME** • Compost food scraps instead of using your garbage disposal, you'll save gallons of water every time and have a great soil amendment for your garden • **Use a ceiling fan to cool off a room or house, it consumes as little energy as a 60-watt bulb, which is about 98 percent less energy than most central air conditioners** • **When replacing an appliance, always look for the ENERGY STAR symbol; compare water and energy usage to ensure you get the best product and environmental savings to suit your needs** • **TAKE A BREAK FROM DRIVING; CONSIDER WALKING, BIKING, TAKING A BUS OR CARPOOLING WHENEVER POSSIBLE**

• **In the market for a new car? Consider one of the new hybrid or fuel efficient vehicles** • Buy a programmable thermostat for your home; you'll keep your home temperature on a predetermined schedule, so you won't waste energy when you're not home or sleeping • **Ditch the Paper Towels! Instead, just pick up some cloth towels that can be used over and over again** • **Put Your Computer to Sleep, with the screen saver running, your computer is still using full power. Putting your computer in "sleep" or "standby" mode will save energy**
